

Customer journey

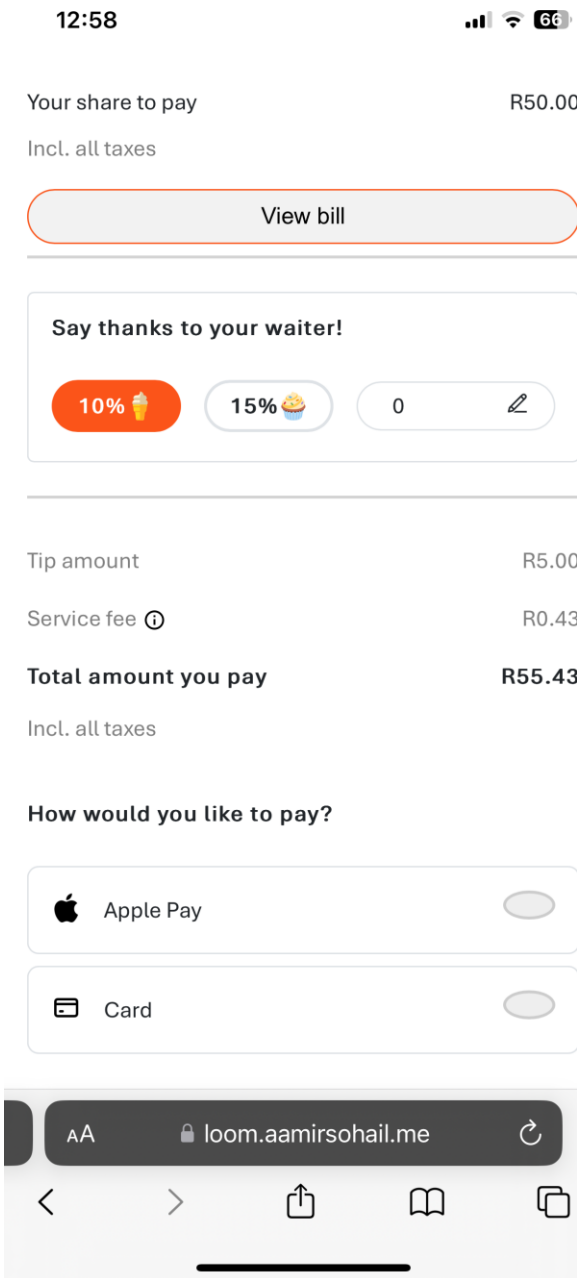

Fixed but now logo is small on iphone SE and normal iphone

“Hi Name” is too close to “View Menu” button

Done but I cant test this fully because there aren't many different items we can add to cart

6: this is supposed to be static and appear at the bottom of the screen

20: service fee amount must be rounded up to two decimals.

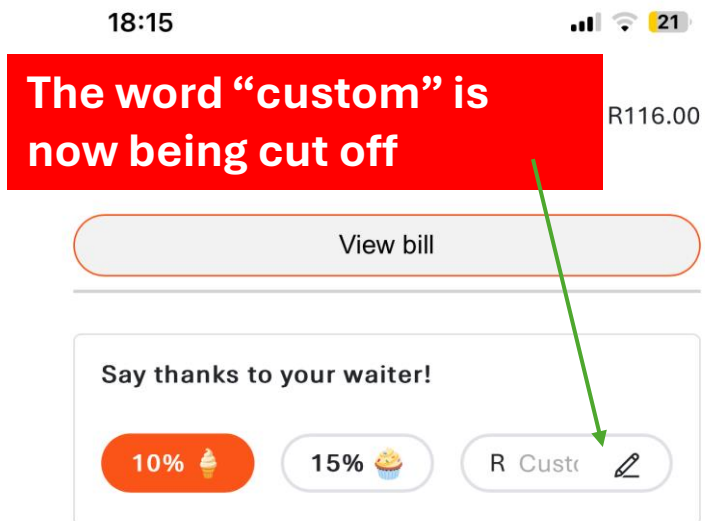

0.875% of R50 is R0.435, but you have rounded down to R0.43 instead of rounding up to R0.44

The decimals should also be rounded up to two decimals. Example:

R10.237 should R10.24

R1.719 should be R1.72

R0.679 should be R0.68

Card

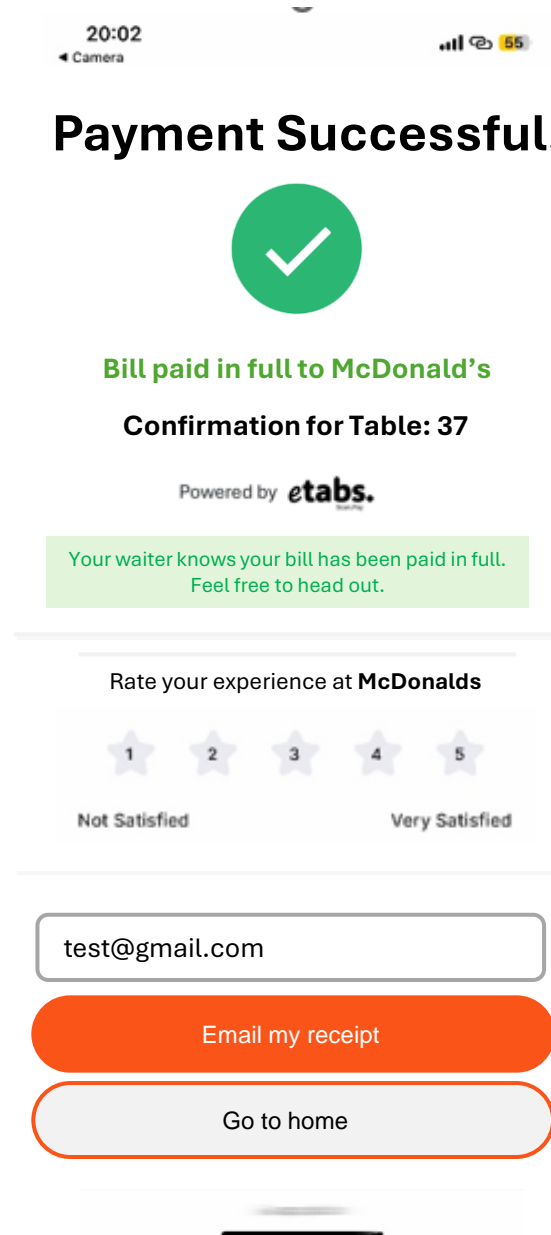

The service fee amount you calculated is incorrect. This is the correct calculation

Bill amount	58.36
Service fee %	0.875%
Service fee amount	0.51

21: Bill confirmation page should look exactly this way including spacing

Google review has still not been included. Here is a test google review link you must include
https://search.google.com/local/writereview?placeid=ChIJN1t_tDeuEmsRUsoyG83frY4

What ever “star” user clicks on will open up this link for user to rate on Google Reviews

22: this bill was partially paid, and was not paid in full. It should read “Bill partially paid to McDonald’s”. It’s only when bill is paid in full in one payment or the very last partial payment that settles the bill should there be the message “Bill paid in full to McDonald’s”

24a: when PARTIALLY paid, the message should say “Your share of the bill is paid up! **R120 remaining of total bill.**” The colour and box should be exactly this colour.

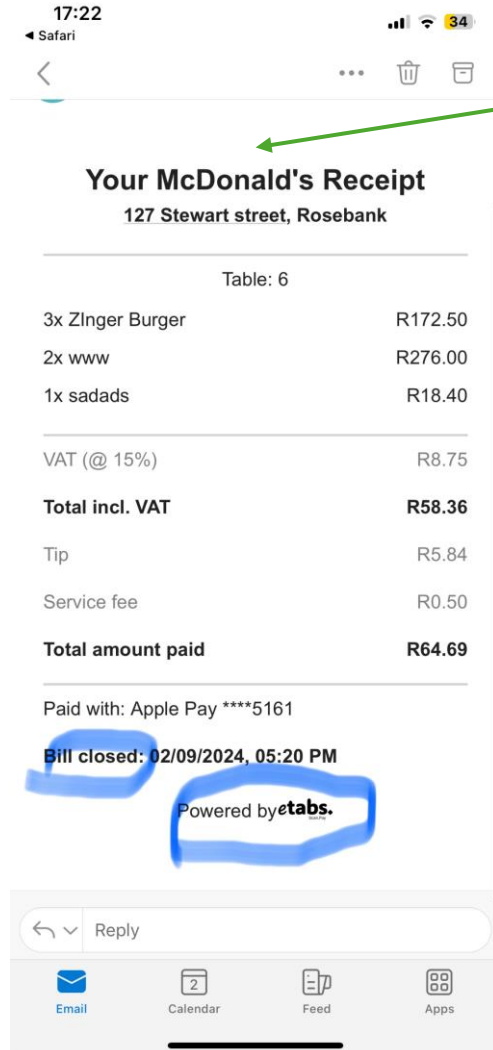

24b: when FULLY paid, the message should say “Your waiter knows your bill has been paid in full. Feel free to head out.” The colour and box should be exactly this colour.

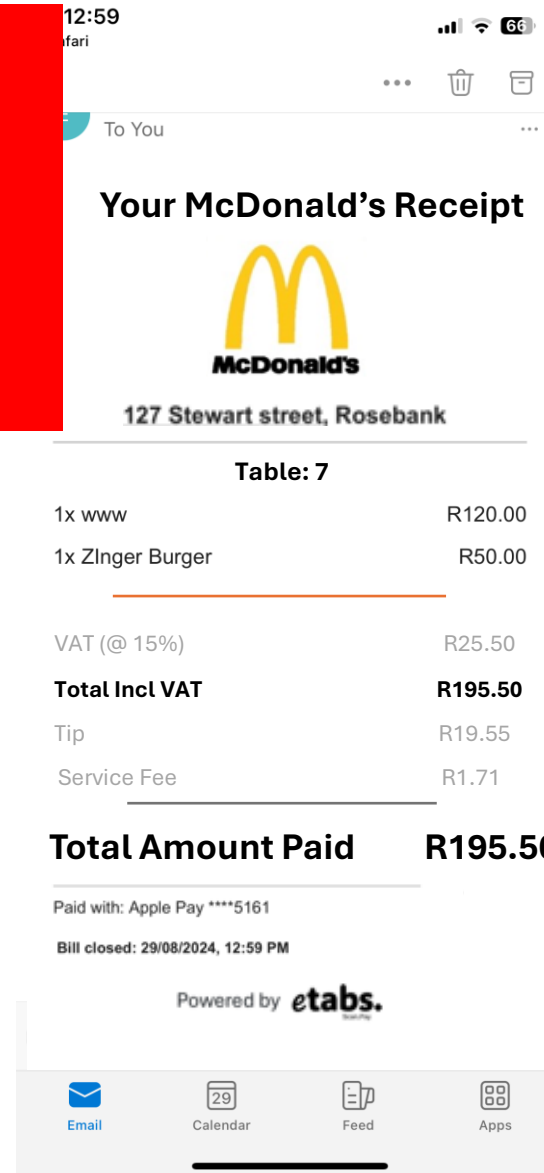

Partially Paid

Fully Paid

- Logo missing
- Etabs logo should be aligned better
- This was a partial payment and should say "Bill partially paid"

26: Top of receipt should have restaurant logo, name and "Receipt" stated above it

27: This page on the right should not appear when selecting apple pay. When selecting Apple Pay, the Apple Pay button should appear and user should click on button to pay directly from this page without being navigated to another page. This functionality is standard. This is how it will work with all other payment methods user selects.
